

Venture Support Studio for Impact Driven Technologies

"We believe in a world where climate change is under control, humanity expands into new frontiers such as space, and people live in balance with nature, supported by technologies created with the right values."

WHAT IS NEXUMA

Nexuma accelerates impact-focused technology companies from deeptech startups to global scale-ups. Unlike traditional consultancies, our founders and experts work directly with client teams, executing alongside them to unlock growth, raise capital, and expand into new markets.

We work with companies whose technology restores, protects, or regenerates environmental systems, advancing human progress in clean energy, AI, materials, and frontier industries.

Mission-Driven Only

Partners exclusively with planet-positive, future-shaping founders

Hands-On, Not Advisory

We embed, fix what's broken, and execute alongside you

Cross-Continental

Deep expertise in US + EU market entry and expansion

Full Venture Stack

Capital, branding, sales, and expansion — fully integrated

SERVICES

Three Core Capabilities

Strategic Capital Advisory Investment Readiness | Fundraising Execution

Prepares startups and scale-ups for their next round – cleaning up operations, sharpening narrative, resolving leadership issues, and building investor confidence from pre-seed to growth stage.

Global Market Expansion US & EU Market Entry | GTM Strategy

Guides ClimateTech and deeptech companies through every step of market entry: ecosystem mapping, regulatory navigation, customer discovery, partner outreach, and local network building.

Fractional Executive Leadership Fractional CMO / CRO | Revenue Strategy

Senior-level marketing, sales, and commercial strategy without the full-time cost. Scalable revenue strategies, predictable pipelines, and founder support through the complexity of global growth.

BUILT & BUILDING

Past & Current ventures

Deltares

Geotech & Water Management

MicroAlign

Photonics for Quantum

Solar and BESS QA & QC

Water Cleaning & Ecology

Antenna measurement

Urban Wind Energy

BUSINESS CASES

Proven Outcomes Across Three Engagements

US MARKET ENTRY

From misaligned HQ to a self-sufficient US operation

A European deeptech scale-up gained a predictable US revenue engine, clear market positioning, and an autonomous local team — with a validated playbook ready to scale.

Predictable pipeline
Autonomous US team
Validated playbook

INVESTMENT READINESS

From a stalled raise to a closed round in 3 months

Operational clarity and leadership alignment restored ahead of a successful capital raise – completed in 3 months, freeing the CEO to refocus on vision and strategy.

Capital raised in 90 days • Operational clarity • CEO refocused

FRACTIONAL MARKETING

Engineering-first startup became investor-ready

A deeptech startup with strong technology but no commercial presence gained a differentiated brand and investor-ready narrative — securing multiple funding rounds.

Differentiated brand
Multiple funding rounds secured

PARTNERSHIPS

Collaborating for Impact
